This exercise set has a dotted minim, which takes three beats, and also quavers which are half beats or half crochets.

You also will see the example of a dotted crochet. By hearing the sound, you will recognize how long each has to be retained, in relation to the rest of the rhythm.

Do not skip through the exercises, as in any art-form, repeated practice makes perfection. After some time, you will realize it yourself. If you have patience, you will attain the goal.
