

Ingredients

Quantity	Measure	Ingredients
100	Grammes	China Grass
0	Little	Flavoring
0	Little	Sugar
4	Teacup	Water

Method

Boil the ingredients and stir as it boils. When the china grass has dissolved, add sugar to taste a few drops of color and flavoring. After boiling for half an hour you should find the ingredients in liquid form.

Pour it into a dish and allow it to cool. It will harden like a jelly. Either cut into diamond shapes, or pour the liquid in ornamental bowls, to get the shape of the bowl as it hardens.

It may be served with a sauce. China grass can be made into bits and soaked in a little water for half an hour and continued as above. Instead of water, milk may be used.
