

## Curry Powder for Fish

Written by Mother's Touch

---

### Ingredients

Quantity	Measure	Ingredients
200	Grammes	Chillies, Red Dry
200	Grammes	Coriander/Dhania
50	Grammes	Jeera/Cumin Seeds
50	Grammes	Turmeric/Haldi

### Method:

Dry the above ingredients in the sun for a day and powder them fine and store in a dry jar or bottle.

You can prepare this masala in a larger quantity, in the above proportions, in summer, and have these ground in a local grinding mill, and store the powder for the rest of the year.

One dessertspoon of this curry powder is enough for half kg of fish. Add [coconut juice](#).
